Election/Restrictions

Page 2

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1 through 22 and 29 through 61 are drawn to a method for evaluating a

processing chamber, classified in class 438, subclass 14.

II. Claims 23 through 28 are drawn to an apparatus for evaluating a process chamber,

classified in class 118, subclass 712.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I through II are related as a method for evaluating a processing

chamber and an apparatus for evaluating a process chamber, for their practices. The inventions

are distinct if it can be shown that either: (1) the process as claimed can be practiced by another

materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

another and materially different process, (MPEP § 806.05(e)). In this case all the inventions are

completely different and distinct from each other. The method for evaluating a processing

chamber as claimed in Group I can be practiced by an entirely different apparatus than that

claimed in Group II.

Art Unit: 2812

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
